

Fig. 1 is a cross-sectional view of a composite material structure. It consists of a central core with a zigzag pattern, surrounded by a layer with horizontal lines, and an outer layer with a diagonal hatching pattern. Labels 1, 2, 3, 4, and 5 point to different layers and features.

A technical drawing showing a cross-section of a multi-layered structure. The structure consists of several layers, with the outermost layer being the thickest. The layers are labeled with numbers 1 through 6. The labels are positioned around the drawing: 1 and 3 are on the left, 5 and 2 are on the right, and 6 is at the bottom. The drawing shows a central core with a vertical line through it, and the layers are separated by thin lines. The layers have different hatching patterns: diagonal lines for the outermost layer, horizontal lines for the next layer, and a solid black fill for the central core.
